LI200P0-Q25LM0-LIU5X3-H1151
Inductive Linear Position Sensor

- **Type**: LI200P0-Q25LM0-LIU5X3-H1151
- **Ident. no.**: 1590002
- **Measuring principle**: Inductive
- **Measuring range**: 200 mm
- **Resolution**: 0.049 mm/12 bit
- **Nominal distance**: 1.5 mm
- **Blind zone a**: 29 mm
- **Blind zone b**: 29 mm
- **Repeat accuracy**: ≤ 0.026 % of full scale
- **Linearity deviation**: ≤ 0.1 %f.s.
- **Temperature drift**: ≤ ± 0.003 % / K
- **Hysteresis**: not applied
- **Operating voltage**: 15…30 VDC
- **Residual ripple**: ≤ 10 % U_{ss}
- **Isolation test voltage**: ≤ 0.5 kV
- **Short-circuit protection**: yes
- **Output function**: 5-pin, Analog output
- **Voltage output**: 0…10 V
- **Current output**: 4…20 mA
- **Load resistance voltage output**: ≥ 4.7 kΩ
- **Load resistance, current output**: ≤ 0.4 kΩ
- **Sample rate**: 500 Hz
- **Current consumption**: < 50 mA
- **Design**: Profile,Q25L
- **Dimensions**: 258 x 35 x 25 mm

**Features**
- Rectangular, aluminium / plastic
- Versatile mounting possibilities
- LED indicates measuring range
- Immune to electromagnetic interference
- Extremely short blind zones
- Resolution, 12-bit
- 4-wire, 15…30 VDC
- Analog output
- Programmable measuring range
- 0…10 V and 4…20 mA
- M12 × 1 male, 5-pin

**Wiring diagram**

**Functional principle**
The measuring principle of linear position sensors is based on RLC coupling between the positioning element and the sensor, whereby an output signal is provided proportional to the position of the positioning element. The rugged sensors are wear and tear-free, thanks to the contactless operating principle. They convince through their excellent repeatability, resolution and linearity within a broad temperature range. The innovative technology ensures a high immunity to electromagnetic DC and AC fields.

**Power-on indication**
- LED, Green

**Measuring range display**
- Multifunction LED, green, yellow, yellow flashing

Mounting instructions

**Mounting instructions/Description**

Extensive mounting accessories provide various options for installation. Due to the measuring principle, which is based on the functional principle of an RLC coupling, the linear position sensor is immune to magnetized metal splinters and other interferences.

**Status display via LED**
- **Green:**
  - Sensor is supplied properly
  - LED indicates measuring range
- **Yellow:**
  - Positioning element is within the measuring range, low signal intensity (e.g. distance too large)
- **Yellow flashing:**
  - Positioning element is outside the detection range
- **Off:**
  - Positioning element is outside the programmed range (only with teachable versions)

**Teaching**
- The start and end point of the measuring range are set by pressing the button on the teach adapter. Moreover there is the possibility of inverting the course of the output curve.
- Bridge pin 5 and pin 1 for 10 s = factory setting
- Bridge pin 5 and pin 3 for 10 s = factory setting inverted
- Bridge pin 5 and pin 3 for 2 s = sets start value of measuring range
- Bridge pin 5 and pin 1 for 2 s = sets end value of measuring range
